

CANADIAN

CONSTRUCTION

A QUANTA SERVICES COMPANY

THE COMPANY

Canadian Utility Construction Corporation (CUC) is a broad-spectrum Construction Company that provides services to the natural gas, electric power, and telecommunications industry. Since 1991, our company continues to model exemplary construction practices which have allowed us to expand our operations in British Columbia, Alberta, and Saskatchewan. The company proudly puts into action its core values by delivering a high-quality product while remaining dedicated to environmental protection and safety of all.

Ditch Witch JT922 – Compact & Powerful | Ditch Witch JT30 – Heavy Duty | HDD Mobility

Environmental Management and Sustainability (Note get Environmental team to add here)

Canadian Utility Construction is committed to protecting the environment. Our Corporate Environmental team continually develops new sustainable initiatives and these protocols are incorporated into every aspect of field construction. At CUC, we are committed to the following environment management principles:

- Comply with all applicable environmental laws and regulations.
- Identify risks to the environment associated with the work and develop risk reduction strategies
- Fully adhere to the principles of Reduce, Reuse and Recycle for all work activities.
- Maintain a continuous improvement focus on our path to excellence in environmental leadership and stewardship

Developed in conjunction with our corporate management team, our Quality Management System is effective, efficient, and compliant with ISO 9000 requirements: CUC is committed to:

- understanding our customer/client's requirements and delivering to expectations.
- continually improving our operations through fully understanding our processes and systems.
- performing defect free work that conforms to all requirements.
